

studio gas fires

a thirty-year history of quality

Gazco is part of the Stovax Group and has been dedicated to the development and manufacture of high quality fires for over 30 years. Today, the Stovax Group is one of UK's leading fireplace manufacturers and exports to over 50 countries worldwide. When you choose Gazco, quality and innovative technology are assured. Our research and development laboratories are amongst the most advanced in the world, ensuring that the very latest innovations are incorporated into our appliances. Nothing creates an inviting atmosphere quite like a Gazco fire; as the centrepiece to your home, it will add warmth and character to any room or living space - even if you don't have a chimney.

Studio 2 Gas Edge with log-effect fuel bed and Vermiculite lining

studio 2 gas fire

The glass fronted Studio 2 is a high efficiency fire that offers the ideal solution for those looking to make a modern style statement, yet still wanting to enjoy the heart-warming ambiance associated with a real log fire. This enticing atmosphere is achieved by the long and lazy flames snaking through highly realistic hand-painted logs beautifully enhanced by an innovative glowing ember effect, which all combines to provide a warming 5.70kW heat output and the ultimate 'real fire' look

The balanced flue Studio 2 comes complete with a Programmable Thermostatic Remote that allows you to operate everything from ignition to flame height along with timer and thermostatic functions. Studio fires also have a convenient external battery, meaning that there is no need for mains electric connection. There is, however, a mains adaptor available should you prefer.

styling your studio...

The Studio 2 is as impressive in its styling potential as it is in its heating performance. Installing your fire as a frameless Edge model will bring a thoroughly contemporary focal point to your room with the beautiful flame picture providing all the aesthetic appeal. To add yet more visual impact, there is a choice of frames all designed to enrich the clean geometric form of the Studio 2. Opt for the timeless styling of the Profil with either an Anthracite or Polished Stainless Steel finish, consider the Expression for a bolder design statement or the Glass for a sleek, chic and shining focal point!

frame options

'Frameless' Edge

Profil - Anthracite

Profil - Polished Stainless Steel (*indent only*)

Glass

Expression - Graphite

lining options

Further extending its appeal and style options, the Studio 2 has two attractive lining choices - classic Black Reeded and smart Vermiculite. The Black Reeded lining offers a striking contrast to the flickering flame, whilst the Vermiculite, brings a brighter alternative even when the fire is off. Each lining enhances the overall setting of your new Studio 2 fire whilst offering their own unique and distinctive finish.

Vermiculite

Black Reeded

Studio Edge & Cool Wall Kits

Full installation information, including the requirement for the use of heat resistant board and high temperature finishing plaster, can be downloaded from www.castworks.com.au

When using the Edge Kit, the fire is recessed by 20mm from the finished wall surface and the kit is finished in black to complement the Studio. When the Cool Wall Kit is used, the fire is recessed by 60mm from the finished wall surface and the kit is left unfinished so that it can be painted to match your decor.

Edge Kit

Installation for studwork or false chimney breast application. Convected heat flows directly out into room

Cool Wall Kit

Installation for studwork or false chimney breast application. Convected heat flows up through an open channel & can be vented back into room at a higher point

technical information

The information on this page is to assist you in your choice of a suitable Gazco fire. This is not intended to be all the information required to install your fire. This can be obtained from your local Gazco retailer or you can download the full installation instructions from the Castworks website at www.castworks.com.au

Fire & Flue Type	Fuel Effect	Heat Input	Heat Output	Efficiency	Remote Control	Lining Options
Studio 2 - Balanced flue	Logs	30MJ/hr	5.70kW	Nat. Gas: 71% Propane: 72.7%	Programmable Thermostatic	Vermiculite or Black Reeded

Frame	Finish	Frame Size	Viewing Area
Profil	Anthracite	1036 x 510 x 13mm	940 x 414mm
Profil	Polished Stainless Steel	1036 x 510 x 13mm	940 x 414mm
Expression	Graphite	1140 x 614 x 40mm	940 x 414mm
Glass	Black glass	1500 x 528 x 29mm	852 x 324mm
Edge	-	945 x 416mm	940 x 414mm

Frame dimensions show overall visible size upon installation.

studio 2 dimensions

All dimensions shown are in millimeters (mm)

balanced flue (no chimney required)

The Studio 2 fire is a balanced flue meaning a chimney is not necessary. The appliance is completely sealed from the room into which it is installed (so there are no draughts and heating efficiency is increased) and a twin-wall pipe vents directly to an outside wall or through the roof.

Air for combustion is drawn in through the outer pipe whilst the inner pipe removes the combustion gases to the exterior of the property. Depending on the fire selected, the twin-walled pipe may exit horizontally through an external wall or vertically through the roof. Gazco offers a comprehensive range of balanced flue system components.
