

***The original
fireplace innovator***

focus

The suspended fireplace began with Focus.

The launch of Gyrofocus in 1968 sparked a revolution in fire. Never before had a fireplace been lifted from the earth, into the air. Focus had made its mark, and we continue to be synonymous with groundbreaking aesthetics today.

Since our small beginnings in Viols le Fort, France, our firm has grown from a simple artist's studio into an international business. Throughout this journey, we have maintained an unwavering commitment to craftsmanship: every Focus fireplace is still handmade in France.

Favoured by architects and tastemakers the world over, the Focus range has received numerous accolades. Gyrofocus was named World's Most Beautiful Object at the Pulchra Design Awards in Italy in 2009, and the Slimfocus recently received the Red Dot Design Award.
